Fluidwell customer support

I'd like to introduce myself. My name is Misja van der Horst and I will be responsible for customer support over the whole range of Fluidwell products both technical and commercially.

I have approximately fifteen years of experience in sales and (field) support on instrumentation and indicators from all kind of manufacturers. I'm already familiar with the Fluidwell range of indicators since the first introduction now 17 years ago. In my former position over the last 10 years I have sold, installed and supported many Fluidwell products in combination with all kinds of different field instruments. Please do not hesitate to send me e-mail or give me a call if you have technical questions. I will do my best to give a fast and satisfying response. Misja van der Horst

Extended range of Intrinsic Safety certificates

We are pleased to announce that we received our fourth Intrinsic Safety certificate for the Fo-Series. Besides the ATEX, IECEx and CSA c-us certificates for Intrinsically Safe applications, we are (since April 24th) FM approved. The allowed ambient temperature is -40°C to +70°C (-40°F to +158°F). All options remain available for the Fo-Series, including the bi-color backlight for applications where readability is an issue.

For more information, visit our website or download the Intrinsic Safety certificates from the downloadpage.

HV back case

On request of some customers, Fluidwell has added a back case to the range of enclosures. The HV is an aluminum back case with 4 holes M20 x 1,5 cable entries. You can see the full range of enclosures at the website or download the enclosure datasheet.

Documentation updated and downloadable

Since fluidwell continuously improves its products, also the documentation is liable to changes. For this reason we have updated the datasheets and made new folders for the F-Series. The folders have been carried out in 15 languages: English, German, French, Dutch, Spanish, Italian, Danish, Swedish, Finnish, Norwegian, Polish, Russian, Arab, Japanese and Chinese. All datasheets are downloadable from the specific product pages and the F-Series folders from the downloadpage on our website.

Please use these marketing tools to promote the Fluidwell products. If you prefer a printed hardcopy: please send an e-mail to wellinformed@fluidwell.com, mention the desired number of copies and the language(s) you would like to receive.
