

## Level Indicator with very large digits

*Application examples: Extreme cold weather regions*

*Level monitoring at a tank / silo*

*Hot and sandy deserts*

**The F-Series is your first and safest choice for field mount indicators in safe and hazardous area applications. Especially in harsh weather conditions like rain, snow, salty atmospheres and temperatures between -40°C up to +80°C (-40°F up to 176°F).**

### Advantages

- Robust aluminum or stainless steel 316L field enclosure (IP67 / NEMA Type4X). It is so rugged, a truck can even stand on it!
- Intrinsically Safe available - ATEX, IECEx, FM and CSA approval for gas and dust applications.
- Programming can be done by your own crew, with the sensible menu-driven structure, saving cost and irritation. Know one, know them all!
- Very diverse mounting possibilities: walls, pipes, panels or directly onto outdoor sensors!

### Features

- Displays level and height or percentage filled.
- Very large 26mm (1") digits.
- Piegraph indication: ten segments.
- Number of digits for level: 5 ½.
- LED backlight option.
- Selectable on-screen engineering units: volumetric or mass.
- Level input signals: (0)4 - 20mA or 0 - 10V DC.
- Loop or battery powered, 8 - 30V DC or 115 - 230V AC power supply.
- Sensor supply 8.2 / 12 / 24V DC.
- Auto backup of all settings.
- Explosion/flame proof available, according ATEX/IECEx.

Introduction

The F070 is a straight forward level indicator. The measuring unit to be displayed is simply selected through an alfa-numerical configuration menu. No adhesive labels have to be put on the outside of the enclosure: a weather proof and user friendly solution! The configuration of the Span, off-set and number of decimals is done through software functions, without any sensitive dip-switches or trimmers. A wide selection of options further enhances the capabilities of this model, including Intrinsic Safety for hazardous area applications.

Configuration

All configuration settings are accessed via a simple operator menu which can be password protected. Each setting is clearly indicated with an alphanumerical description, which avoids confusing abbreviations. All settings are safely stored in EEPROM memory in the event of sudden power failure.

Hazardous areas

For hazardous area applications, this model is ATEX, IECEx, FM and CSA certified as Intrinsically Safe for gas and dust applications, with an allowed ambient temperature of -40°C to +70°C (-40°F to +158°F). A flame proof Ex d enclosure with ATEX/IECEx certification is also available.

Display

The display has very large 26mm (1") digits which can be set to show level and height or percentage filled. As the F070 has been designed for field mounted applications, a smart display update function has been incorporated. Related to the lower temperatures, the update frequency of the LCD is tuned automatically to achieve a readable display even at -40°C / -40°F.

Backlight

For those applications where readability during day and night is an issue, a white backlight is available. The intensity can be adjusted from the keyboard. The display is a transfective type, which means that a high contrast reading is guaranteed in full sunlight as well as during the night. This backlight option is also available Intrinsically Safe.

## Overview application F070

The F-Series is your first and safest choice for field mount indicators in safe and hazardous area applications. Especially in harsh weather conditions like rain, snow, salty atmospheres and temperatures between -40°C up to +80°C (-40°F up to 176°F). Applications where a basic level measurement display is required without level monitoring and linearisation. More sophisticated models: F073, F077, F170, F173 and F190 or the D-Series DIN panel mount indicators.

## Signal input

The F070 accepts (0)4 - 20mA and 0 - 10V input signals from any type of level measurement device. Also a 4 - 20mA input loop powered model is available.

## Power requirements

Several power supply options are available to power the F070 and sensor. A battery powered version with a long life lithium battery which will last up to five years. A 4-20mA input loop powered version is available as well. A real sensor supply is offered with the 24V AC/DC or 115-230V AC power requirement options.

Robust, even a truck can stand on it!

Resistant to harsh weather

Enclosures

Various types of enclosures can be selected, all ATEX and IECEx approved. The F070 is supplied in an GRP panel mount enclosure as standard, which can be converted to an IP67 / NEMA Type4X GRP field mount enclosure by the addition of a back case. Most popular is our robust aluminum field mount enclosure which is also available with an extended backcover with undrilled preparation for direct meter mounting at the back side. It is so rugged, even a truck can stand on it! For the most challenging environments we have a durable high grade Stainless steel 316L enclosure. All enclosures have a IP67 / NEMA Type4X rating and EU or U.S. cable gland entry threads available.

Hazardous area applications

The F070-XI has been certified according to ATEX and IECEx by DEKRA and according to CSA c-us and FM for use in Intrinsically Safe applications with an ambient temperature of -40°C to +70°C (-40°F to +158°F). For equipment category 1 D (EPL Da), -40°C to +50°C (-40°F to +122°F).

It is allowed to connect up to three I.S. power supplies to power the unit, sensor and backlight. Consult the certificate for the maximum input and output values of the circuits.

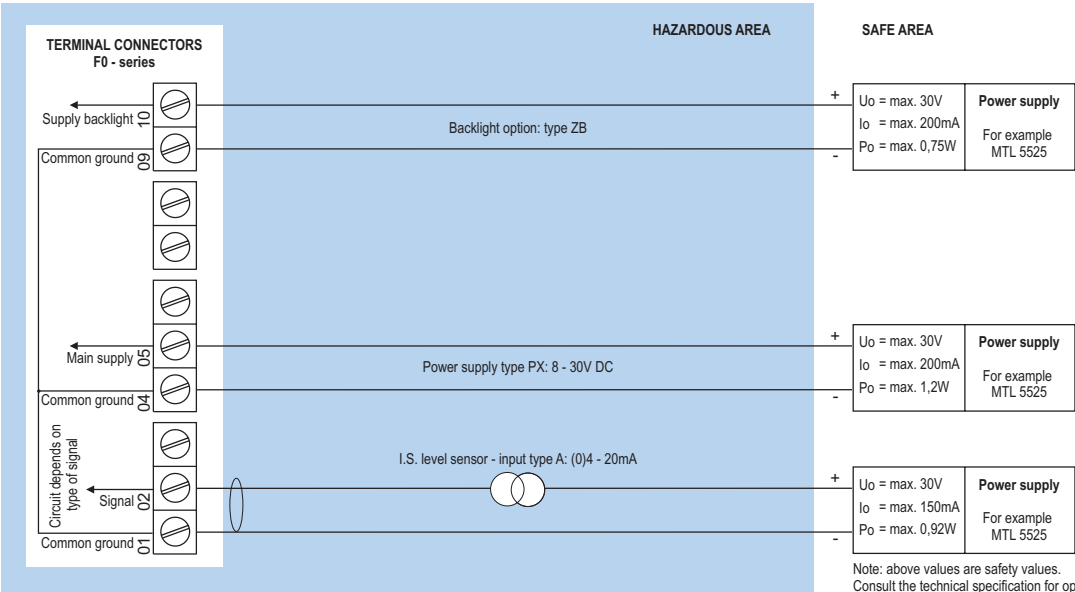

Note: Extended aluminum enclosures are not available with CSA c-us and FM approvals.

The F070-PD-XI offers the input voltage to power an analog sensor. An ATEX/IECEx approved flame proof Ex d enclosure is available as well. Please contact your supplier for further details.

<b>Type HSO</b>	Cable entry: 2 x M20.
<b>Type HSU</b>	Cable entry: 3 x 1/2" NPT.

## Signal inputs - Level sensor

<b>Type A</b>	(0)4 - 20mA. Analog input signal can be scaled to any desired range within 0 - 20mA.
<b>Type U</b>	0 - 10V DC. Analog input signal can be scaled to any desired range within 0 - 10V DC.
<b>Accuracy</b>	Resolution: 16 bit. Error < 0.01mA / ± 0.05% FS. Low level cut-off programmable.
<b>Span</b>	0.001 - 199,999 with variable decimal position.
<b>Offset</b>	-99,999 / +199,999 units.
<b>Update time</b>	Four times per second.
<b>Voltage drop</b>	Type A: max. 1V DC @ 20mA.
<b>Voltage drop</b>	Type A - PL (loop powered): max. 2.6V DC @ 20mA.
<b>Relationship</b>	Linear and square root calculation.
<b>Note A / U</b>	For signal type A and U: external power to sensor is required; e.g. type PD.
<b>Note A / U</b>	Span for height is 0.01 / 199,999 with variable decimal position.
