

IBC filling skid N410 batch controller

Showcase: A producer of industrial liquids deliver their goods in Intermediate Bulk Containers (IBC's) and faced several manual dispensing challenges. Intercontrol, a Fluidwell customer, designed an automated IBC filling solution with a Fluidwell N-Series batch controller as the main component of the installation.

Manual dispensing challenges

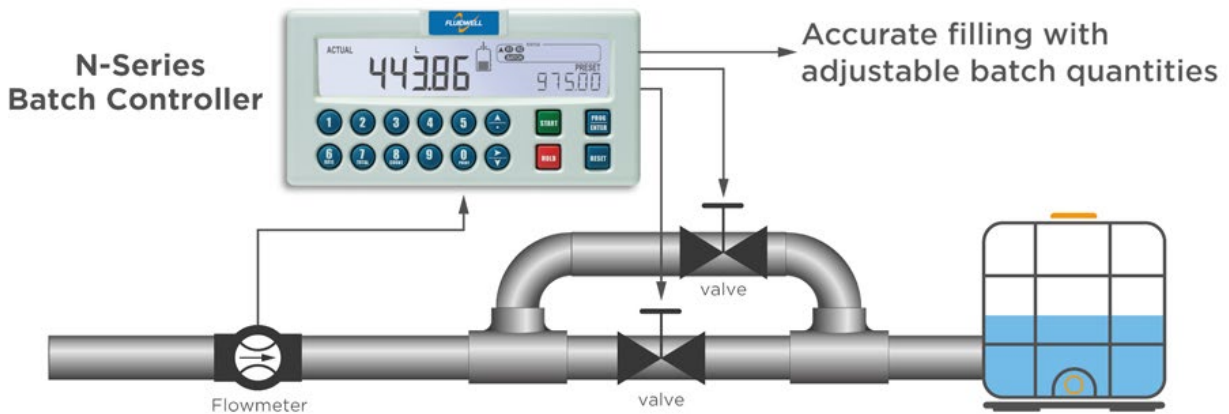

- Too much spilling.
- Contamination risks.
- Inaccurate batches.
- Hard labor.

N410 Batch control solution

- Accurate repeating batches.
- Sustainable: Reduce spills and leakage.
- Increase process efficiency.
- Easy adjustable batch sizes.
- Compatible with any flowmeter.
- Easy to operate.
- Heavy duty, relay outputs for electronic valve control.
- Remote control inputs.
- Modbus Communication.
- High accuracy.
- Ticket printing. (N413 and N414)
- Weights & measures approvals. (N414)
